- **Superb coverage 5 Litres will approx. cover seven panel sides of rough sawn fencing.**
 - **Can be applied by brush, roller and sprayer.**
 - **Suitable for use over creocote.**
 - **No odour and brushes can be cleaned in water.**

BIRD BRAND Shed & Fence One Coat Protection is a superior timber treatment specially formulated for use on rough sawn garden timbers. Providing waterproofing protection from the first coat, it is ideal for fencing, sheds, trellis and other garden timbers. Shed & Fence One Coat Protection is also pet and plant safe for you and your family's peace of mind. Shed & Fence One Coat Protection will transform grey weathered wood giving it all the protection it requires, bringing a great new look to the garden.

Useful Information

Further coats can be applied when a darker colour or additional weathering protection is required. Normally touch dry within 1 to 2 hours, and can be recoated in 4 hours if necessary in normal weather conditions.

Safe for use around plants and pets when dry. Splashed plants can be washed using a watering can or damp cloth to prevent staining.

Coverage 6-10m² per litre. 5 litres should be sufficient to treat 7 fence panel sides, although this may vary depending on the absorbency of the wood.

BEFORE YOU GET STARTED - CONSIDERATIONS

A one coat colour can be expected on new, weathered and similarly coloured panels including Creosote. If over-coating strong or contrasting colours, or where additional weathering protection is required, further coats may be necessary. As with all other water-based garden treatments, Shed & Fence One Coat Protection is not suitable for use on decking, garden furniture or interior timbers.

Smoother planed i.e. lattice type panels may require several brush coats to achieve the desired effect. Being less generous per coat should avoid any excess being washed off. Old surface paints should be completely removed to ensure that the timber treatment penetrates into the wood. For wood in contact with the ground, first apply a clear wood preserver and allow to dry before applying Shed & Fence One Coat Protection.

Preparation

Apply Shed & Fence One Coat Protection on a dry day when rain is not expected. Do not apply in temperatures below 10°C.

Ensure the timber is clean and dry, and remove any dirt or green mould.

Handy Tip - *If your fence is green from algae growth, why not spray on 'Bird Brand Fungicidal Wash? After rinsing off and allowing to dry, the green stain should disappear within days giving extra life and result in a better finish to your timbers.*

Application

Stir well before and during use.

Brush - Apply generously onto sawn timber in a thick even coat, ensuring colour is uniform. Take care not to spread the product too far.

Roller - Roll along the direction of slats but use a brush to remove any excess foaming and to cut into any corners and ridges.

Sprayer – Suitable for most airless coarse sprays. Follow manufacturers guidelines, but take precautions against drips, mist and product run off spoiling other surfaces.

Clean up

Before cleaning remove as much product from the brush/roller as possible. Clean brushes whilst wet with water and detergent. Many local authorities offer special facilities for disposal of waste materials. Do not empty into drains or watercourses.

PRECAUTIONS

Keep out of reach of children and pets. Avoid contact with skin and eyes.

After contact with skin wash immediately with plenty of water, or a proprietary skin cleanser. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. If swallowed, seek medical advice immediately. Keep away from food, drink and animal feeding stuffs. Children and pets should be kept away until dry. Protect from frost. Use only in well ventilated areas. Do not use at temperatures below 10°C or in conditions of high humidity. To avoid risk of spillage always store and transport in a secure and upright position. Colour label indicates approximate colour only. The treatment of a test area to determine final colour is recommended.

Caution: Please note Bird Brand cannot be held responsible for incidence, failure to perform or damage to or resulting from the use of third party spraying equipment.

This product is only for use as directed. As the manufacturer cannot know all the uses its products may be put to, it is the users responsibility to determine suitability for use. If in doubt contact our Technical Department for advice.
