

Safety Data Sheet

Gyproc[®] Cove Adhesive

SAFETY DATA SHEET

Gyproc Cove Adhesive

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of the substance/mixture and of the company/undertaking 1.1. Product identifier Product name Gyproc Cove Adhesive 1.2. Relevant identified uses of the substance or mixture and uses advised against Identified uses Cove adhesive for fixing Gyproc Cove and Cornice to plaster or plasterboard surfaces. Uses advised against No specific uses advised against are identified. 1.3. Details of the supplier of the safety data sheet Supplier British Gypsum East Leake Loughborough Leicestershire **LE12 6HX** IIK T: +44 (0) 115 945 6123 E: bgtechnical.enquiries@bpb.com 1.4. Emergency telephone number +44 (0) 115 945 6123 **Emergency telephone** 8:30am - 5:00pm Monday - Friday (GMT) **SECTION 2: Hazards identification** 2.1. Classification of the substance or mixture Classification (EC 1272/2008) Physical hazards Not Classified Health hazards Not Classified **Environmental hazards** Not Classified Human health Dust may irritate the eyes and the respiratory system. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases. 2.2. Label elements Hazard statements NC Not Classified Precautionary statements P102 Keep out of reach of children. 2.3. Other hazards This product does not contain any substances classified as PBT or vPvB.

Avoid inhalation of dust. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Calcium sulfate hemihydrate		50 - 75%
CAS number: 7778-18-9	EC number: 231-900-3	REACH registration number: 01- 2119444918-26-XXXX
Substance with National workplace	e exposure limits.	
Classification Not Classified		
Limestone		25 - <50%
CAS number: 1317-65-3	EC number: 215-279-6	
Substance with National workplace	e exposure limits.	
Classification		
Not Classified		

The full text for all hazard statements is displayed in Section 16.

SECTION 4: First aid measures

4.1. Description of first aid measures

General information	Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical personnel.	
Inhalation	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Ingestion	Rinse mouth thoroughly with water. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Skin contact	Brush off loose particles from skin. Remove affected person from source of contamination. Rinse immediately with plenty of water.	
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.	
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.	
4.2. Most important symptoms and effects, both acute and delayed		
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.	
Inhalation	Dust may irritate the respiratory system. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases.	
Ingestion	May cause discomfort if swallowed. May cause stomach pain or vomiting.	
Skin contact	Prolonged contact may cause dryness of the skin.	
Eye contact	Dust may cause slight irritation.	
4.3. Indication of any immediate medical attention and special treatment needed		
Specific treatments	No special treatment required.	

Notes for the doctor	Treat symptomatically.	
SECTION 5: Firefighting measures		
5.1. Extinguishing media		
Suitable extinguishing media	The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.	
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.	
5.2. Special hazards arising from	om the substance or mixture	
Specific hazards	None known.	
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.	
5.3. Advice for firefighters		
Protective actions during firefighting	Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out.	
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.	
SECTION 6: Accidental release	e measures	
6.1. Personal precautions, pro	tective equipment and emergency procedures	
Personal precautions	No action shall be taken without appropriate training or involving any personal risk. Keep	

Prsonal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Avoid inhalation of dust. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage.

6.2. Environmental precautions

Environmental precautions Avoid discharge to the aquatic environment. Aquatic toxicity is unlikely to occur. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

6.3. Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Reuse or recycle products wherever possible. Approach the spillage from upwind. Avoid generation and spreading of dust. Small Spillages: Remove spillage with vacuum cleaner or collect with a shovel and broom, or similar. Large Spillages: Collect spillage with a shovel and broom, or similar and reuse, if possible. Collect and place in suitable waste disposal containers and seal securely. Containers with collected spillage must be properly labelled with correct contents and hazard symbol. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

6.4. Reference to other sections

Reference to other sections For personal protection, see Section 8. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Keep container tightly sealed when not in use. Avoid generation and spreading of dust. Avoid handling which leads to dust formation. Avoid inhalation of dust. Avoid contact with eyes and prolonged skin contact.
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.
7.2. Conditions for safe storag	e, including any incompatibilities
Storage precautions	Store away from incompatible materials (see Section 10). Store in a dry place. Store in accordance with local regulations.
Storage class	Unspecified storage.
7.3. Specific end use(s)	
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.

SECTION 8: Exposure controls/Personal protection

8.1. Control parameters

Occupational exposure limits

Calcium sulfate hemihydrate

Long-term exposure limit (8-hour TWA): WEL 10 mg/m³ inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m³ respirable dust

Limestone

Long-term exposure limit (8-hour TWA): WEL 10 mg/m³ inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m³ respirable dust

Dextrin

Long-term exposure limit (8-hour TWA): WEL 10 mg/m³ respirable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m³ inhalable dust

Quartz (SiO2)

Long-term exposure limit (8-hour TWA): WEL 6 mg/m³ inhalable dust Long-term exposure limit (8-hour TWA): WEL 2.4 mg/m³ respirable dust [Listed as: Silica, amorphous]

Quartz (SiO2)

Long-term exposure limit (8-hour TWA): WEL 0.1 mg/m³ respirable dust [Listed as: Silica, respirable crystalline] WEL = Workplace Exposure Limit.

Calcium sulfate hemihydrate (CAS: 7778-18-9)

DNEL	Workers - Inhalation; Long term systemic effects: 21.17 mg/m ³ Workers - Inhalation; Short term systemic effects: 5082 mg/m ³ General population - Inhalation; Long term systemic effects: 5.29 mg/m ³ General population - Inhalation; Short term systemic effects: 3811 mg/m ³ General population - Oral; Long term systemic effects: 1.52 mg/kg/day General population - Oral; Short term systemic effects: 11.4 mg/kg/day
PNEC	STP; 100 mg/l

Trisodium citrate (CAS: 68-04-2)

PNEC	Fresh water; 0.44 mg/l marine water; 0.044 mg/l STP; 1000 mg/l Sediment (Freshwater); 34.6 mg/kg Sediment (Marinewater); 3.46 mg/kg Soil; 33.1 mg/kg
8.2. Exposure controls	
Appropriate engineering controls	As this product contains ingredients with exposure limits, process enclosures, local exhaust ventilation or other engineering controls should be used to keep worker exposure below any statutory or recommended limits, if use generates dust, fumes, gas, vapour or mist. Provide extract ventilation at the points where emissions occur. Ensure the ventilation system is regularly maintained and tested.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. The following protection should be worn: Dust-resistant, chemical splash goggles.
Hand protection	For prolonged or repeated use and in the event of a large spillage: Wear protective gloves. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.
Other skin and body protection	Wear appropriate clothing to prevent repeated or prolonged skin contact.
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Respirator selection must be based on exposure levels, the hazards of the product and the safe working limits of the selected respirator. Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.
SECTION 9: Physical and ch	emical properties

9.1. Information on basic physical and chemical properties	
Appearance	Powder.
Colour	Off-white.
Odour	Odourless.
Odour threshold	Not determined.
рН	No information available.

Melting point	No information available.
Initial boiling point and range	Not applicable.
Flash point	Not applicable.
Evaporation rate	Not applicable.
Evaporation factor	Not applicable.
Flammability (solid, gas)	No information available.
Upper/lower flammability or explosive limits	No information available.
Vapour pressure	No information available.
Relative density	No information available.
Solubility(ies)	Slightly soluble in water.
Partition coefficient	No information available.
Auto-ignition temperature	No information available.
Decomposition Temperature	No information available.
Viscosity	Not applicable.
Explosive properties	Not considered to be explosive.
Oxidising properties	Does not meet the criteria for classification as oxidising.
9.2. Other information	
9.2. Other information Other information	None.
Other information	
Other information SECTION 10: Stability and rea	
Other information SECTION 10: Stability and rea 10.1. Reactivity	activity
Other information SECTION 10: Stability and real 10.1. Reactivity Reactivity	activity
Other information SECTION 10: Stability and rea 10.1. Reactivity Reactivity 10.2. Chemical stability	See the other subsections of this section for further details. Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.

Stable under the prescribed storage conditions. Teactions No potentially hazardous reactions known. Avoid handling which leads to dust formation. No specific material or group of materials is likely to react with the product to produce a hazardous situation.

11.1. Information on toxicological effects

Toxicological effects	Not regarded as a health hazard under current legislation.
Acute toxicity - oral	
Summary	Based on available data the classification criteria are not met.
Acute toxicity - dermal	
Summary	Based on available data the classification criteria are not met.
Acute toxicity - inhalation	
Summary	Based on available data the classification criteria are not met.
Skin corrosion/irritation	
Summary	Based on available data the classification criteria are not met.
Serious eye damage/irritation	
Summary	Based on available data the classification criteria are not met.
Respiratory sensitisation	
Summary	Based on available data the classification criteria are not met.
Skin sensitisation	
Summary	Based on available data the classification criteria are not met.
Germ cell mutagenicity	
Summary	Based on available data the classification criteria are not met.
Carcinogenicity	
Summary	Based on available data the classification criteria are not met.
Reproductive toxicity	
Summary	Based on available data the classification criteria are not met.
Specific target organ toxicity -	single exposure
Summary	Based on available data the classification criteria are not met.
Specific target organ toxicity -	repeated exposure
Summary	Based on available data the classification criteria are not met.
Aspiration hazard	
Summary	Not relevant. Solid.
General information	This product has not been tested on animals. Data for ingredients is based on historical evidence.
Inheletion	
Inhalation	Dust may irritate the respiratory system. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases.
Ingestion	May cause discomfort if swallowed. May cause stomach pain or vomiting.
Skin contact	Prolonged contact may cause dryness of the skin.
Eye contact	Dust may cause slight irritation.
-	
-	
Skin contact	Prolonged contact may cause dryness of the skin.

Toxicological information on ingredients.

Calcium sulfate hemihydrate

	Toxicological effects	The toxicity of this substance has been assessed during REACH registration. Not regarded as a health hazard under current legislation.
	Acute toxicity - oral	
	Notes (oral LD ₅₀)	LD₅₀ >2000 mg/kg, Oral, Rat
	Acute toxicity - inhalation	
	Notes (inhalation LC₅₀)	LC₅₀ >3.26 mg/l, 4 hours, Dust/Mist Rat
	Skin corrosion/irritation	
	Animal data	Dose: 0.5 g, 4 hours, Rabbit Erythema/eschar score: No erythema (0). Oedema score: No oedema (0). Not irritating.
	Serious eye damage/irritati	on
	Serious eye damage/irritation	Dose: 100 mg, , Rabbit Not irritating.
	Skin sensitisation	
	Skin sensitisation	Buehler test - Guinea pig: Not sensitising.
	Germ cell mutagenicity	
	Genotoxicity - in vitro	Bacterial reverse mutation test: Negative.
	Genotoxicity - in vivo	DNA damage and/or repair: Negative.
	Carcinogenicity	
	Carcinogenicity	Based on available data the classification criteria are not met.
	Reproductive toxicity	
	Summary	This substance has no evidence of toxicity to reproduction.
	Specific target organ toxicit	ty - single exposure
	STOT - single exposure	Not classified as a specific target organ toxicant after a single exposure.
	Specific target organ toxicit	ty - repeated exposure
	STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.
	Aspiration hazard	
	Aspiration hazard	Not relevant.
		Limestone
	Toxicological effects	Not regarded as a health hazard under current legislation.
SECTION 1	2: Ecological information	
Ecotoxicity		arded as dangerous for the environment. However, large or frequent spills may have us effects on the environment.
<u>12.1. Toxici</u>	t <u>y</u>	
Toxicity	Based of	n available data the classification criteria are not met.
Ecological i	nformation on ingredients.	
		Calcium sulfate hemihydrate
	Toxicity	Not toxic at limit of water solubility.

Limestone

Toxicity	Not regarded as dangerous for the environment.
12.2. Persistence and degradability	
Persistence and degradability The d	egradability of the product is not known.
Ecological information on ingredients.	
	Calcium sulfate hemihydrate
Biodegradation	Substance is inorganic. Not relevant.
	Limestone
Persistence and degradability	The product contains inorganic substances which are not biodegradable.
12.3. Bioaccumulative potential	
Bioaccumulative potential No da	ta available on bioaccumulation.
Partition coefficient No inf	ormation available.
Ecological information on ingredients.	
	Calcium sulfate hemihydrate
Bioaccumulative potentia	al Bioaccumulation is unlikely.
	Limestone
Bioaccumulative potentia	al No data available on bioaccumulation.
12.4. Mobility in soil	
Mobility Slight	ly soluble in water. Hardens in contact with water.
Ecological information on ingredients.	
	Calcium sulfate hemihydrate
Mobility	The product has poor water-solubility.
	Limestone
Mobility	Slightly soluble in water.
12.5. Results of PBT and vPvB asses	sment
Results of PBT and vPvB This p assessment	product does not contain any substances classified as PBT or vPvB.
Ecological information on ingredients.	
	Calcium sulfate hemihydrate
Results of PBT and vPvI assessment	B This substance is not classified as PBT or vPvB according to current EU criteria.
	Limestone

Results of PBT and vPvB This substance is not classified as PBT or vPvB according to current EU criteria. **assessment**

12.6. Other adverse effects

Other adverse effects None known.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

General information	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.
Disposal methods	Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.

SECTION 14: Transport information

General

The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).

14.1. UN number

Not applicable.

14.2. UN proper shipping name

Not applicable.

14.3. Transport hazard class(es)

No transport warning sign required.

14.4. Packing group

Not applicable.

14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant No.

14.6. Special precautions for user

Not applicable.

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations	Health and Safety at Work etc. Act 1974 (as amended).
	The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment
	Regulations 2009 (SI 2009 No. 1348) (as amended) ["CDG 2009"].
	EH40/2005 Workplace exposure limits.

EU legislationRegulation (EC) No 1907/2006 of the European Parliament and of the Council of 18
December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of
Chemicals (REACH) (as amended).
Commission Regulation (EU) No 2015/830 of 28 May 2015.
Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16
December 2008 on classification, labelling and packaging of substances and mixtures (as
amended).

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet	ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road. ADN: European Agreement concerning the International Carriage of Dangerous Goods by
	Inland Waterways.
	RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail.
	IATA: International Air Transport Association.
	ICAO: Technical Instructions for the Safe Transport of Dangerous Goods by Air.
	IMDG: International Maritime Dangerous Goods.
	CAS: Chemical Abstracts Service.
	ATE: Acute Toxicity Estimate.
	LC₅₀: Lethal Concentration to 50 % of a test population.
	LD_{50} : Lethal Dose to 50% of a test population (Median Lethal Dose).
	EC₅₀: 50% of maximal Effective Concentration.
	PBT: Persistent, Bioaccumulative and Toxic substance.
	vPvB: Very Persistent and Very Bioaccumulative.
