

OIL COLOURANT

PRODUCT DESCRIPTION

Super high-quality pigment specifically formulated to give superior colour saturation. Concentrated Woodgrain colourant can be used with Oil Scumble and Extra Pale Varnish.

Concentrated colourant can be used with all oil based decorative glazes and varnishes used in the theatre, film, scenery decorative paint industry.

Contains a blend of organic pigments dispersed in a mixture of surfactant, humectant, preservative and glycol.

The pigment content is approximately 50%, the particle size is 5m.

All colourants are intermixable to give any colour woodgrain.

available in: mahogany dark oak, pine, medium oak, light oak teak and walnut.

MIXING

Acrylic Colorants may be added up to a maximum of 5% by weight. But considering that it is highly concentrated, you can obtain best results by adding a minimum.

Ensure product is well mixed, do not mix batch numbers.

Pour the liquid to be coloured into a suitable container and mix with the oil colourant to achieve the desired density.

CAUTION

Concentrated colourant requires very small additions to vary the colour.

Test colour and mix before applying.

COVERAGE: dependant on base medium.

CLEAN UP

Colourant only

Any equipment used can be cleaned using soap and water. Wipe any excess off surfaces with a damp cloth.

Mixed with oil product clean using white spirit.
