

## BREWERS SHED & FENCE STAIN

Brewers Shed & Fence Stain is a water based, wax enriched formulation designed to protect wood from UV rays and extreme weather. It provides a durable, water-resistant finish perfect for exterior sawn timber. Ideal for sheds, fences and trellis, it offers a colour-fast formula guaranteed for up to 5 years, while allowing the wood to breathe.

|                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Recommended uses</b>       | Exterior rough sawn timber such as sheds, fences and trellis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Type of substrate</b>      | Rough sawn timber. <b>Please note:</b> Not suitable for planed timber, decking, garden furniture or timber in direct contact with the ground.                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Finish</b>                 | Matt                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Coverage</b>               | Brewers Shed & Fence Stain will cover approximately 12 square metres per litre depending on the nature and porosity of the timber.                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Drying time</b>            | Under normal conditions; touch dry after 1-2 hours, recoatable after 2-4 hours. Avoid application in adverse conditions                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Transportation storage</b> | To avoid the risk of spillage, always store and transport in a secure upright position. Protect from frost. Always store within the temperature range 5°C to 30°C. Lift with care – gross weight does not exceed 8 kilograms (5L size).                                                                                                                                                                                                                                                                                                   |
| <b>VOC content</b>            | MINIMAL VOC CONTENT. EU limit value for this product (Cat A/e): 130g/l (2010). This product contains a maximum of 3g/l VOC.                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Preparation</b>            | Ensure all surfaces are sound, clean, dry and free from dirt, grease, mould or other surface contaminants. Treat any mould or lichen with Albany Fungicidal Wash as directed. Rub down previously painted or varnished surfaces, old paint and varnish should be completely removed prior to use. Treat the base of fence posts with a suitable wood preserver. Avoid inhalation of dust. Wear a suitable face mask if dry sanding. Special precautions should be taken when preparing pre-1960s paint surfaces as they may contain lead. |
| <b>Application</b>            | Stir well before use. Apply by brush only, working the stain well into the timber along the grain, paying particular attention to the end grain. 2-3 coats may be required to achieve best results. If using more than one tin in the same area, intermix enough in a large container to ensure colour consistency. Avoid contact with plant life until dry. Ensure good ventilation during application and drying and do not apply in temperatures below 10°C or when rain is imminent.                                                  |
| <b>Cleaning</b>               | Remove as much product as possible from equipment before cleaning. Clean tools immediately after use with <b>warm soapy water</b> and rinse thoroughly. Replace lid firmly after use. Do not empty product into drains or watercourses.                                                                                                                                                                                                                                                                                                   |

## Product Data Sheet
